Prisma "Collusion"

([Galileo Records](#))

UPC: 7640103898352

Cat#: none

Genre: Metal/Progressive

Prisma's sound isn't only progressive-rock. They love working on new ideas and letting these ideas flow into their songs.

The songs have a lot of technical finesses, psychedelic, hypnotic melodies, but they always keep their toughness. Their different influences and their presence can capture anyone.

The compact and powerful connection between the musicians and the striking songwriting are the bands trademarks.

Live they work with a formation called "Pixel Punx". They work on the creative visual part on stage, which makes the live-act even more interesting.
