[\(Nightmare Records \)](#)

UPC: 734923003823

Cat#: NMR-262

Genre: Progressive/Metal

Release Date: July 4, 2006

Format: CD & MP3

CLOUDSCAPE was formed in 2001 (Helsingborg - Sweden). They describe their music to be "melodic metal with progressive touches". During 2001 & 2002 they recorded several demos and sent them out to magazines, webzines and record labels in order to get attention and feedback. The feedback from press turned out great and CLOUDSCAPE became quite well known in the underground scene but, the lack of interested record labels made CLOUDSCAPE contact production & management (nowadays also record label) company Roastinghouse in order to ask them to help CLOUDSCAPE out finding a suitable and interested label for them. Roastinghouse has a daily contact with many record labels in different genres around the world so, this finally led up to a few interested record labels. During spring 2004 CLOUDSCAPE entered the Roastinghouse recording studios in order to record their self-titled debut (produced by Anders "Theo" Theander & Pontus Lindmark). The album was finished in late summer of 2004 so, the album was later on released all over Asia by Japanese label "Marquee/Avalon" (street date: 18/12-2004) and the european release was handled by German label "Metal Heaven" (street date: 28/1-2005). The debut album got a great welcome to the metal scene and reviews turned out amazing. CLOUDSCAPE did several shows in Sweden in order to promote their debut album and in October the 2:nd 2005 they went to The Netherlands in order to perform live at "Progpower Europe" which turned out to be a success for CLOUDSCAPE. In late December 2005 CLOUDSCAPE entered the Roastinghouse studio again in order to record their second album entitled "Crimson skies" but, this time it was Pontus Lindmark who handled the production duties and Anders "Theo" Theander was executive producer. "Crimson skies" was mixed, mastered and finished in March 2006 so, the street date for Europe is set to JUNE 3 - 2006. Releasedates for Asia and the U.S are yet to be confirmed. CLOUDSCAPE has been booked for several shows during 2006 and recently announced

that they will perform at "Sweden Rock Festival" and "Gothenburg Metal Festival". More gigs and a small tour is in a planning process right now.
